## Example Class

- Every week one set of exercises.
- Work on them “at home” and hand in the solutions.
- Discuss you ideas with fellow students.
- You can hand in your solutions **alone** or in a group **with one other student**.
- The Example Class is given in a **hybrid format**.
- Register via:

<https://urm.math.uni-tuebingen.de>

- Register by **Friday, October 22, 12pm**
- **Example Class starts this Thursday at 8:15am!**

Example Class

Online-Tools

Proof of  
Performance

- A new set of exercises every **Tuesday** afternoon
- Hand in your solutions by the following **Monday**, 10am
- Hand in your solutions online via URM
- For every set of exercises hand in ONE pdf-file in URM.
- The marked solutions will also be provided viy URM.

# Singular

- SINGULAR is a computer algebra system for computations in polynomial rings
- allows to compute most of the operations introduced in the lecture
- a short introduction in the first example class this week
- If possible, bring your own laptop and have SINGULAR installed already.

Proof of  
Performance

- Exam:
  - oral exam in the lecture free period
- Prerequisite for the exam:
  - So called “Übungsnachweis”:
- How do you get this:
  - **regular** participation, i.e. attendance in the exercises and submission of independently and sensibly processed solutions
