3. Lecture

- 3.1) The course aims have been clearly defined.
- The instructor presents the material in a comprehensible way
- 3.3) The aims and the structure of the course are clear.
- The speed of lecturing is
- The instructor appeared to be well prepaired.
- 3.6) The instructor stimulates active participation.
- The instructor encourages independent treatment of the issues
- 3.8) Attending the course has been useful to me.

4. Exercises

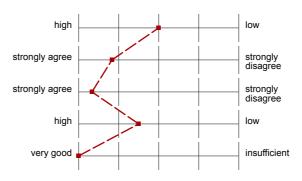

- Attending the exercise class has been worthwhile.
- The exercises have encouraged me to further engage in the contents of the lecture.
- 4.3) The exercises match the current content of the lecture.

5. Overall impression

- I think this amount is
- In this course, it is always clear to me, what I need to do.
- The course has increased my interest in the subject matter.
- The degree of difficulty of the course is
- ^{5.6)} I give this course the following grade:

n=6	mw=3	md=3	s=1,1
n=6	mw=1,8	md=2	s=0,4
n=6	mw=1,3	md=1	s=0,5

3. Lecture

- ^{3.9)} You can put further comments here.
- Mr Tumulka holds very captivating lectures, its like listening to a story. I have never had this understandable and enjoyable lectures.

4. Exercises

- 4.5) You can put further comments here.
- It's a bit much calculating and little proving for a math master course
- I think the excercises make a lot of sense, but i prefer having excercises which rework the learned material and often, the given excercises are rather additional to the proven materials in the lecture.

6. Overall impression free text

- 6.1) What do you like about this course?
- I like the philosophical and physical aspects of the course with a focus on mathematical rigor. I like that one understands enough of the physics. I always wanted to take a look at the theoretical physics site, but I wouldn't want to see too much simplified math and I think this is the right course for something like this (though it could still be a bit more rigorous).
