

Data Management Plan  
ERC Starting Grant MathQuantProp  
grant agreement no. 101163620

Marius Lemm

May 19, 2025

This ERC project is devoted to theoretical mathematics. It is not expected that any significant data is generated beyond the mathematical results and proofs. These will be published both on the public arXiv.org preprint server and in scientific journals.

It is possible that, to guide the possible mathematical research questions, short computer programs will be written using standard scientific computing software (e.g. Wolfram Mathematica or Matlab). The PI will share the computer code by email with interested persons upon their request.
