

The TRR „Symbolic Tools in Mathematics and their Application“ presents
on Wednesday 26 September 2018
at Kupferbau Lecture Hall 22 at 7 pm

a film produced in the frame of the SFB-TRR 109 „Discretization in
Geometry and Dynamics“

The Discrete Charm of Geometry

How is modern mathematical teamwork carried out?
- A multiple award-winning film by Ekaterina Eremenko -

“A perfect film about mathematics. The story is told in an impressionistic way and that works perfectly. The world of mathematics.”

Public TV in Russia

“Mathematics was a horror to me at school, but to my surprise I couldn't turn away from the screen.”

Lev Novozhenov, writer

“With striking images, some mathematical humor, a little drama, and a nice puzzle, this is again a very charming movie.”

John Rognes, Chairman of the Abel Committee

“Each shot shows beauty or truth, or even both of them. A combination that we know from mathematics.”

Andrew Okounkov, Fields Medal 2006
